

## WORK ON COLLEGE HALL IS RUSHED

Catholic University Building Will Be Occupied by March 15.

**ELABORATE DINING-ROOM**  
Two Floors of Structure to Be Used for Dormitories, Total Cost Being \$250,000.

From the progress made up to date on the new dining-hall and dormitory being built at Catholic University it is expected the building will be ready for the accommodation of students by March 15. The work is being done by the Boyle-Boyd Construction Company, from plans prepared by Murphy & Olmstead, architects.

The building is to be of Gothic architecture and will have a total length of 200 feet. Only the middle section, 140 feet long, is to be finished now, however, the two "wings" to be completed when necessary demands. The structure will be three stories high.

The dining-hall, which will take up the entire lower floor, will be encircled by oak wainscoting twelve feet high, surmounted by ornamental carved woodwork. The wainscoting will be finished as fumed oak. There will be a base of Numidian marble around the entire room, and the floor will be of quartered oak laid in patterns with an ornamental centerpiece in the middle of the room.

**Two Floors for Dormitories.**

The two floors above the dining-hall will be finished as a dormitory. The dining-hall will have a length of 200 feet, when the "wings" are completed. It will be divided into three sections, separated by lobbies twenty feet square. One of these lobbies and the middle section 120 feet long are being finished now.

The portion of the building now being completed will cost about \$150,000. The cost of the entire structure will be about \$250,000.

The windows of the dining-hall are of the English basement type, with metal frames. Ornamental leaded glass is to be installed. Already one window of appropriate design, costing in the neighborhood of \$1,000, has been donated by friends of the university, and it is said that others have been promised. The space between the windows above the wainscoting is to be devoted to portraits of donors to the university.

At either end of the room there will be a balcony for musicians or for speaking purposes. On either side of the balconies space will be provided for paintings of appropriate subjects. The ceiling is to be treated with deep plaster coffers of the Gothic type. Illumination will be provided by a number of hanging chandeliers of verde antique finish.

From the lobbies at either end of the main dining-room stairs will lead to the dormitory floors above. At one side of the lobby provision will be made for serving pantries, from which steps will lead to the kitchen below. The kitchen will be 120 feet long and twenty feet wide and will be equipped with the latest culinary apparatus.
